Education

Georgia Institute of Technology	Dec 2025
M.S in Computer Science, ~57th youngest student in program history (0.14th percentile).	
University of California, Berkeley	Dec 2024
B.A in Applied Mathematics, Graduating at age 18.	3.73/4.00

Experience

Uncountable - Incoming Software Engineer - San Francisco, CA	Jan 2025
Heimdall Data - Software Developer Intern	Aug 2023 - Feb 2024
<ul style="list-style-type: none">Improved customer Time-to-value (TTV) by simplifying virtual database setup GUI in Heimdall Proxy by introducing caching checks, resulting in ~50% fewer clicks to starting database initialization.Corrected login history inaccuracies in application, achieving a ~50% increase in precision by refactoring authentication workflow through Spring Security and Angular and writing mock authentication tests in JUnit.	
ZoneUp - Contract Software Engineer	May 2023 - Jul 2023
<ul style="list-style-type: none">Directly collaborated with cross-functional teams (UX Designer, CEO, CTO) on a full-stack landing page by writing 6,000 lines of code using React, Express, and PostgreSQL incorporating 3D models and animations. [site]Designed a cost-efficient AWS Architecture to handle 2,000 monthly users using Lambda and RDS.Introduced DevOps productivity tooling by automating CI/CD with AWS CodePipeline & configuring auto scaling EC2 instances with Elastic Beanstalk and Docker, reducing deployment & autoscaling time from 10min to <1 min.	
Good Work Hub - Freelance Software Developer	May 2023 - Jul 2023
<ul style="list-style-type: none">Reduced deployment time of Good Work Hub applications from 10 min to 2 min and compute cost by ~40% by designing and developing a new CI/CD pipeline from the company codebase to a DigitalOcean droplet.Implemented safeguards for code stability by configuring linters & test-runners for incoming PRs with GitHub Actions and documenting unit test & style guidelines in Confluence, increasing unit test code coverage by 50%.	
Django Software Foundation - Open Source Contributor	Mar 2023 - May 2023
<ul style="list-style-type: none">Co-authored optimization effort for count() & exists() Queries in the Django ORM by writing ~200 lines to remove extraneous SQL inner join calls, reducing processing time for certain count and exists queries by ~90%. [PR]	

Projects

GenAI Scenery Creation with Stable Diffusion
<ul style="list-style-type: none">Latent Diffusion model fine tuned with LoRA to generate Miyazaki style background scenery. Model trained with Weights & Biases experiment tracking, data from BeautifulSoup web scrapes, and deployed on AWS EC2.
Competitive Programming Teaching Portal
<ul style="list-style-type: none">In-house learning portal for when I was a programming teacher, integrating JWT authentication, Stripe Payments API, and embedded code editor. Built using Express and PostgreSQL, and hosted with AWS Lambda & RDS.
Digicache Photo Sharing Platform
<ul style="list-style-type: none">React app that allows users to create and share pins at custom locations, created with Google Maps API, GraphQL & MongoDB. Project won a Major League Hacking Award at the Technica 2022 Hackathon.

Skills

Tooling: AWS, Docker, GH Actions; React, Express, MongoDB; PyTorch, Weights/Biases, HuggingFace, BeautifulSoup
Languages: Python, Javascript, Java, C++, SQL (MySQL, PostgreSQL), Matlab, R; Typescript, HTML, CSS.
Coursework: Data Structures, Machine Structures, Machine Learning, Linear Algebra, Discrete Math, Probability

Awards and Certifications

Machine Learning: [DeepLearning.AI Specialization](#) (2024) Cloud: [AWS Solutions Architect Certification](#) (2024)
USACO Gold Qualifier: ranked top 10% of 18k contestants by writing efficient algorithms in Java/C++.
